

Ambient Clinical Scribe Report

Transcript

And what brings you to the emergency department today low back pain? Okay, and where exactly is the back pain? So the the pain is just rated in the in the lower back. Just in the lower back. Okay, and when did this pain start? It started yesterday. I was unloading groceries for my pickup truck and wanted to suddenly started. Okay, so and did you kind of make any kind of movements or did you fix something really heavy? I bought sure. I just noticed the pain after after that. Okay, and what kind of pain are you experiencing? Is it like a dull cramping pain or is it more like a sharp or stabbing thing? It feels like it's stabbing just right in my lower back. Okay, and on a scale of one to ten, one being like the least pain that you felt in your life, ten being the worst, how much would you rate this pain? If I'm sitting completely still like like I have right now, it's just a two out of ten. Okay, and when does it get worse? Anytime I move or I bend my back or even cough, it worsens the pain significantly. Okay, and has this pain changed at all since yesterday? No, it's been this same awful pain this whole time. Okay, and have you ever had this kind of pain before? I've had a back pain over the years, but nothing like this before. Okay, and does it pain going or does it just stay in the lower back? I also feel the pain into my right leg. Okay, and is it the same kind of aching or like stabbing pain that goes into your right leg? Or is it just like an aching pain? It's an aching pain. Okay, and do you have any other symptoms besides the pain like are you experiencing any kind of weakness or any kind of any other changes in your health? No, no, it's just the low back pain. Okay, and have you ever experienced any kind of trauma to your back like something and take you or you fall down, anything like that? No, I can't remember any injuries like that in the past. Okay, any fevers or chills or night sweats? No fever, no chills, no night sweats. Okay, any symptoms of feeling really tired, fatigue, anything like that? Uh, no, a bit, a bit okay recently. Okay, any changes to your skin at all? Any rashes? Okay, any pain in your joints at all? Just the back pain. Okay, any new coughs or any symptoms and runny nose or anything like that? Uh, no. Any changes in your bowel movements at all like diarrhea, constipation or anything? Nothing like that has been regular. Okay, and how about any urinary problems? Uh, no, nothing to report there. Okay, and how has your appetite been? Uh, appetite has been normal. Okay, any significant weight loss or weight gain recently? No, the way it's been about the same. Okay, any recent infections that you know? No, I've been feeling well otherwise. Okay, any tingling sensation or numbness in your back or lower limbs in your legs? Uh, no numbness or tingling. Okay, any muscle weakness at all? Uh, no muscle weakness. Okay, and I've even, uh, having any, uh, kind of an erectile dysfunction, uh, no concerns with, uh, erectile dysfunction. Okay, and any issues with, uh, incontinence, like, having accidents at all at night or during the day? Uh, no, I haven't had any problems with, uh, bowel or bladder incontinence. Okay. All right, in terms of your past medical history, have you, uh, have you been diagnosed with any conditions like high blood pressure, diabetes? Uh, type two diabetes. Okay, and you take any medications for it? Uh, I, um, insulin for diabetes. And any other medications at all? Uh, just been taking Tylenol for the, the back pain. And has that worked for you at all? Or has it, um, any difference? Uh, maybe it's taken the edge off a little bit, but it hasn't done too much, uh, to, to help the pain. Okay, any allergies? Uh, nope. Okay, any previous surgeries? Uh, I had hemorrhoids removed three years ago. Okay, um, any hospitalizations before? Uh, nope, those are just day surgery. Okay. Any family history of any, um, conditions, um, or like, incantors? Uh, my father had prostate cancer. Okay. And currently right now, uh, do you work? Uh, I'm a retired school teacher. Okay. And, uh, where do you live? I live alone, um, in a, in a house, um, not too far from here, actually. Okay. And, uh, do you, do you drink at all? Um, uh, occasionally, uh, maybe I'll have a glass of red wine on the weekend or something like that, but, uh, not too often. Okay. And, uh, do you smoke? Uh, I've smoked, um, yeah, I smoke a pack of cigarettes, uh, per day. Okay. And for how long have you smoked, uh, cigarettes for? Uh, well, 40 years. 40 years? Okay. And, uh, do you use any kind of recreational drugs? Uh, never. Okay. And how's your diet like on, like, an regular basis? I feel like it's, uh, pretty normal, mostly home cooked meals. Uh, it was a variety of vegetable, vegetables, uh, other meats and fish. I would say it's pretty balanced. Okay. All right. I just have a few more questions for you. Um, are you currently sexually active? Uh, yes I am. Okay.

And, uh, who are you sexually active with any new partners at all? Uh, no new partners. Um, just my girlfriend. Uh, and, uh, how many, I'm sorry, go ahead. Um, just my, my, uh, girlfriend recently. Okay. And, uh, have you been sexually active with more than one partner in the past, past year? Uh, yes I have, um, um, two women over the past year. Okay. And, um, how do you use any kind of protection? Yes, always use condoms. Okay. All right. So now I'm just going to get the patient's vitals.

SOAP Note

Subjective

Patient reports sudden onset of lower back pain yesterday while unloading groceries. The pain is described as stabbing in the lower back and radiating into the right leg with an aching quality. Pain worsens with movement, bending, or coughing. Patient denies any trauma to the back, fever, chills, night sweats, weakness, changes in health, joint pain, new coughs, runny nose, changes in bowel movements, urinary problems, erectile dysfunction, incontinence, allergies, previous surgeries beyond day surgery, family history of conditions, recent infections, tingling sensation or numbness. Patient is a retired school teacher living alone and reports occasional alcohol consumption and smoking a pack of cigarettes per day for 40 years. The patient is sexually active with one partner, the girlfriend, and uses condoms for protection.
